Lloyd Rotastar

Mobile Screening and Crushing are proud distributors in NZ for Lloyd Engineering 'Screening Buckets'.

The Lloyd Rotastar is a unique, high output screening bucket that combines many market leading features.

Material is constantly rotated, without any chopping or pinching, making screening of damp, fragile and special materials possible.

• SUITABLE FOR A VAST RANGE OF TON EXCAVATORS

RS 2-4	2-4 Ton Excavator
RS 3-5	3-5 Ton Excavator
RS 4-6	4-6 Ton Excavator
RS 4-9	4-9 Ton Excavator
RS 8-14	8-14 Ton Excavator
RS 10-20	10-20 Ton Excavator
RS 13-20	13-20 Ton Excavator
RS 20-30	20-30 Ton Excavator

- Variable speed control is fitted as standard up to the RS10-20
- High output and excellent cost effectiveness
- Quiet running
- Massive screening area
- Rugged construction, for long life and reliability
- Light weight, flexible, self-cleaning polyurethane Stars
- Uncompromised quality with high-output
- Original, unrivalled performance
- Easy maintenance

SCREENS AN ENORMOUS RANGE OF MATERIALS:

- Compost • Top Soil • Sand • Stone • Peat • Aggregates
- Mixed waste • Trench padding • Fine screening

BENEFITS INDUSTRIES :

- Construction • Demolition • Quarrying • Waste Recycling
- Landscaping

Rotastar 

" These screening buckets are impressive in a large range of very wet, difficult material. Customers that have been given demo trials, are impressed by what is being witnessed and have ordered units on the spot."

" These buckets fill the gap in the demand for smaller screening units to process soils, compost and aggregates, that are well priced – yet still able to fulfil contractors' requirements for a quality product and throughput rates."

Operations Manager 'Dan Meikle'

THE UNRIVALLED PERFORMANCE, DURABILITY AND CONSISTENCY OF LLOYD BUCKETS, ARE REASONS WHY MSC LTD CONTINUES TO BE NZ'S NO.1 SCREENING BUCKET DISTRIBUTOR.

Carrier weight : 3 to 30 ton excavators.

Massive screening area with replaceable inner panels for machine longevity and shaft end discs for low running costs.

Output: 10-90 ton per hour.

High output screening attachments for topsoil, compost and waste.

Unique rotary material flow, with no pinching or crushing.
